IDEM PACKET

PLEASE COMPLETE AND RETURN TO
NEWBURGH UTILITY OFFICE

IDEM PACKET – \$60.00

Sanitary Sewer Application Contents:

Request for capacity

Requirements submitted by engineer designing project

Request sent to WWTF by Newburgh Utility Office:

- Project Name
- Subdivision
- Owner
- Engineer
- Location of Project
- General Project Description
- Peak Flow
- Plan Drawing/Sketch
- Point of Connection

Once capacity is approved, a letter is sent to Warrick County Area Plan Commission.

If a letter of credit is posted, a security letter is sent to WCAPC.

Sanitary Sewer Submittal Documents for Newburgh WWTF:

- Submittal Checklist Application
- Sanitary Sewer Design Summary
- Sanitary Sewer Contract Application
- Boundary Description
- Cost Estimate
- Sanitary Sewer Construction Permit Application
- Certificate of Registered Engineer / Surveyor Letter – from Project Applicant
- Capacity Certification/Allocation Letter – from Town Engineer
- Application Fee - \$60.00
- Town of Newburgh, IN Sanitary Sewer Design and Construction Standards (as updated July 2018) signed cover sheet
- Sanitary Sewer Plans
- Notification Letter Regarding Receipt of a Sanitary Sewer Construction Permit Sent from Newburgh Utility Office to IDEM – signed by Sewer Commissioner
- Notice of Intent to Issue Construction Permit Sent from Newburgh Utility Office to IDEM

TOWN OF NEWBURGH
NEWBURGH SEWER DEPARTMENT
NEWBURGH, INDIANA 47630

SEWER CONSTRUCTION PERMIT
AND CONTRACT APPLICATION
DOCUMENTATION

Dear Applicant:

To complete the processing of your request for a sewer construction permit and contract with the Town, it is necessary that you submit all documents. If your application materials are incomplete they will be returned to you with a notice of deficiencies and you will be required to start the process over and pay a new fee. In addition to the added cost, your project will be delayed while plan review occurs subsequent to submittal of a completed application and it is not the Town's desire that your project be delayed.

Please be sure to complete the following steps:

√ Complete all areas of the Applications. On any area that you believe is not relevant, please so state.

√ Complete all information on the sewer design summary and certify it by an Indiana Registered Professional Engineer, or, if the design deals only with gravity sewers and no lift station, and Indiana Registered Land Surveyor, who was responsible for the design of the proposed system.

√ Date and sign the application form and assure it is completed. The party or parties signing the application form must be the party or parties who will contact with the Town to build the sewer. If the party who wishes to contract to build the sewer is other than the fee owner of the real estate to be served by the sewer, such fee owner or owners must be made parties to the contract as the terms affect their ownership interest in the real estate.

√ Submit the completed and executed Applications, together with three sets of plans with profiles and bedding details and the required processing fee. Every page of the plans and profile must be stamped and signed by the engineer or surveyor who is responsible for the creation of the drawings. The submission is to be made to the Newburgh Sewer Department Office, Newburgh, Indiana.

√ Include the cross-reference number from the property deed to the subdivision and a copy of the legal description of the property clearly marked "EXHIBIT A".

If you have any questions regarding the requirements of a contract or a construction permit, please feel free to contact us before completing and submitting your application and documentation.

NEWBURGH TOWN COUNCIL

TOWN OF NEWBURGH
NEWBURGH SEWER DEPARTMENT
NEWBURGH, INDIANA 47630

PROJECT NAME: _____

OWNER: _____

I. SANITARY SEWER CONTRACT APPLICATION FORM

A. Applicant's Name and Address

B. Applicant's Engineer Company

1. Name

2. Name

3. Address

4. Phone Number

C. Name and Location of proposed Sanitary Sewer

D
Signature of Applicant or Authorized Agent including date signed

II. SANITARY SEWER DESIGN SUMMARY FORM

- A. Design Form
1. Multiply number of units by recommended average flow for that type of unit. Refer to Bulletin S.E. 13, page 18 and 19, which can be obtained from the Indiana Department of Health, for all flows not listed on design summary form as well as the Town's ordinances.
 2. Total all average flow and enter total average flow
 3. Enter Peaking Factor. If Peaking Factor is unknown, a factor of 4 is usually sufficient, however, an exact factor may be calculated from the following equation:

$$\text{Peaking Factor} = \frac{18 + \sqrt{P}}{4 + \sqrt{P}}$$

WHERE "P" IS THE POPULATION IN THOUSAND

4. Multiply Total Average Flow by the peaking Factor and enter product as PEAK FLOW.
- B. Gravity sewer length and type. Please indicate the length, diameter, and type of sewer pipe with applicable SDR and ASTM Specifications, and type of bedding.
- C. Certifier's Seal. Design Summary Form must be sealed by a Registered Professional Engineer or Land Surveyor if no Lift Station is involved.
- D. Connection

Point

1. Diameter of existing sewer at Connection Point
(Unless Connection Point is at a Lift Station)
2. Location of Connection Point relative to an intersection of 2 streets
(If possible, i.e. so many feet west and so many feet north of
the
intersection of this street and that street)

E. Lift Station: Enter all proposed Lift Station information, or enter
N/A if no Lift Station is involved.
(If an existing Lift Station is being directly affected, enter
existing

Lift Station information and specify that it is an existing Lift Station)

1. Number and capacity of pumps
2. Provide design calculations for TDS and wet-well detention time.
3. Provide a graph of the pump curves
4. Specify highest elevation in the force main
5. Specify force main length, diameter and material (ASTM and SDR),
and bedding
6. Specify and audio and visual alarm with self contained power
supply or telemeter.
7. Specify nature of back-up power source for lift station, if any

III

PLANS AND SPECIFICATIONS

A. Each and every page of the plans must be SIGNED AND SEALED,
as well as, the cover page for specifications.

1. Professional Engineers, who are registered within the State of
Indiana, are eligible to certify Plans and Specifications for all types
of projects.
2. A Land Surveyor who is registered within the State of Indiana may
Certify Plans and Specifications for Gravity Type Sanitary Sewers
only, and may not certify Plans and Specifications involving Lift

Stations and Force Mains

3. Submit a copy of the plat for the subdivision with the plans - 8.5 x 14

B. The following items are usually necessary for property Technical

Review of Sanitary Sewers and Lift Stations

1. Plan view of the sewers including minimum ten foot horizontal separation of Sewer and Water mains, can connection point of the proposed Sanitary Sewer.

2. Profile view of the sewers including: slope, invert, elevations, existing grade, proposed grade, distances from manhole to manhole, existence of special features, and a minimum 18 inch vertical separation of Sewer and Water mains.

3. Where applicable, details of all appurtenances including manholes, drop manholes, inverted siphons, etc.

4. Bedding details for installation of Sanitary Sewers/Force Mains

a Rigid Pipe: should be Class I or II materials as defined in the latest edition of the Town's Sanitary Sewer Design and Construction Standards.

b Flexible Pipe: should be Class I or II materials as defined in the latest edition of the Town's Sanitary Sewer Design and Construction Standards.

5. Minimum three (3) foot cover depth above the crown of the Sanitary Sewer/Force Main

6. Automatic Air Relief valves to be placed at all relative high points in the Force Main to prevent air locking.

7. Mechanical joints should be specified for all aerial, river or lake crossings.

*NOTE: Construction within a floodway (river, lake, etc.) must receive approval from the Department of Natural Resources, Division of Water.

IV. THE APPLICATION FROM MUST BE SIGNED AND DATED BY
THE APPLICANT OR HIS DULY AUTHORIZED AGENT.

*PLEASE NOTE THAT THIS CHECKLIST IS ONLY DESIGNED TO EXPEDITE THE REVIEW PROCESS BY ASSISTING THE APPLICANT IN SUBMISSION FOR SANITARY SEWER CONSTRUCTION PERMITS, AND IN NO WAY IS INTENDED TO REPLACE THE TECHNICAL REVIEW PROCESS, NOR IS IT A SUBSTITUTE FOR THE ACTUAL CONSTRUCTION PERMIT.

CAPACITY CERTIFICATION/ALLOCATION LETTER
(This Form Should be Filled Out in its Entirety)

Applicant: _____

Owner: _____

Project Name: _____

I, _____, representing the _____, in my capacity
(Name of Individual) (Name of City or Town)
as _____ have the authority to act on behalf of the _____ and
(Title) (Name of City or Town)

certify that I have reviewed and understand the requirements of 327 IAC 3 and that the sanitary collection system proposed, with the submission of this application, plans and specifications, meets all requirements of 327 IAC 3. I certify that the daily flow generated in the area that will be collected by the project system will not cause overflowing or bypassing in the collection system other than NPDES authorized discharge points and that there is sufficient capacity in the receiving water pollution treatment/control facility to treat the additional daily flow and remain in compliance with applicable NPDES permit effluent limitations. I certify that the proposed average flow will not result in hydraulic or organic overload. I certify that the proposed collection system does not include new combined sewers or a combined sewer extension to existing combined sewers. I certify that the ability for this collection system to comply with 327 IAC 3 is not contingent on water pollution/control facility construction that has not been completed and put into operation. I certify that the project meets all local rules or laws, regulations and ordinances. The information submitted is true, accurate, and complete, to the best of my knowledge and belief. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

Gallons Per Day: _____
(Total Average Flow for Project)

Wastewater Treatment Plant: _____

Date Signed

(Please refer to IC 13-30-6-2 for penalties of submission of false information. False certification could result in imprisonment or a fine of up to \$10,000)

**CERTIFICATION OF REGISTERED PROFESSIONAL ENGINEER OR LAND
SURVEYOR LETTER**

(This Form Should be Filled Out in its Entirety)

Applicant: _____

Owner: _____

Project Name: _____

I, _____, representing the project applicant, in my capacity as a registered
(Name of Individual)
professional _____, _____ certify the following
(Engineer or Land Surveyor) (Indiana Registration Number)

under penalty of law: The design of this project has been performed under my direction or supervision to assure conformance with 327 IAC 3 and the plans and specifications require the construction of said project to be performed in conformance with 327 IAC 3-6. The peak daily flow rates, in accordance with 327 IAC 3-6-11 generated from within the specific area that will be collected by the proposed collection system that is the subject of the application, plans, and specifications (when functioning as designed and properly installed), will not cause overflowing or bypassing in the same specific area serviced by the proposed collection system other than from NPDES authorized discharge points. The proposed collection system does not include new combined sewers (serving new areas) or a combined sewer extension to existing combined sewers. The sewer at the point of connection is physically in existence and operation. Based upon information provided by the Owner of the Wastewater System, the ability for this collection system to comply with 327 IAC 3 is not contingent on downstream water pollution control system construction that has not been completed and put into operation. The design of the proposed project meets applicable local rules or laws, regulations and ordinances. The information submitted is true, accurate, and complete, to the best of my knowledge and belief. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.
